science
shows!**

**Ride
on the Red
Arrows and
360° Flight
Simulators!**

Join us for a trip to the Science Museum!

London Fostering Achievement works with children looked after, foster carers, schools, virtual schools and social workers across the capital to raise aspiration and achievement around education.

We'd like you to join us to meet the children and professionals involved in the project at a special celebratory event at Launchpad at The Science Museum. We feel that having your support and attendance on the day will make it a truly inspirational event for all involved and will really support our efforts to make the young people and professionals feel that we are valuing and celebrating their hard work.

In partnership with nine London virtual schools, we'll be hosting an evening of delicious milkshakes and spectacular scientific fun at a special museum opening, bringing together those involved in the project to build relationships and boost aspiration around what children looked after can achieve.

The *Launchpad* is packed with over 50 interactive exhibits, plus electrifying shows and lively demos, all from the wonderful world of physics. *Launchpad* is all about asking questions and making sense of the way things work. What am I looking at? What would happen if...? Please come along and join some of London's looked after children, their foster families, teachers, virtual schools and social workers to have some fun and learn together about the amazing world around us.

Each looked after child from a participating school will receive a a £25 gift voucher to spend in the marvellous Science Museum Shop and have the chance to meet some special guests. For more details and to sign up, visit:
www.londonfosteringachievement.org.uk/event/celebration

Date: 23rd September 2015

Time: 6.45pm – 8.45pm

Address: Launchpad, Science Museum, Exhibition Road, London SW7 2DD
(enter via Group Entrance door)

This event is fully funded as part of London Fostering Achievement, with special thanks to London virtual schools.
