

Y Cwricwlwm Cymreig Welsh Language Placeholder

What does it mean to live, work and study in Wales? What is Welshness? How can schools promote learners' knowledge and understanding of the forces that shape contemporary Wales? How can local and national heritage and culture be used to engage all learners, particularly those from disadvantaged backgrounds who may not have the same 'social capital' as their more privileged peers? This module engages with these questions. It is designed to help you understand what is meant by Y Cwricwlwm Cymreig, how it might be promoted and evaluated in your settings and to explore possibilities for developing partnerships, research and sharing best practice.
