

How to change your Sprite

1. Click on the Costumes tab.
2. Click Import.

You should have something that looks like this .

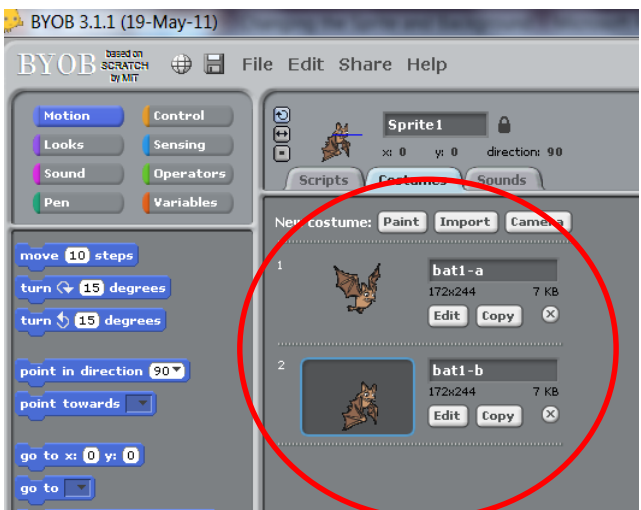

1. Select the Costume you want.
2. Click OK

Notice the old costume still appears - Delete this using the X. 2

Multiple Costumes?

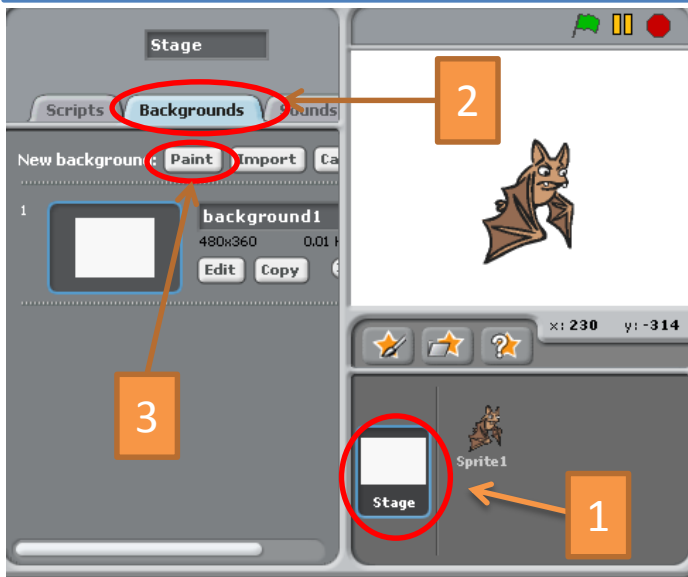

Animation works by having more than one picture of the same character. Import a new Costume and select the second bat. You should finish with something similar to the picture is below.

Remember your costume for the main character is very important in order to interest your audience in your game. Can you get your bat to change costume when the Space key is pressed.

How to change the Background for your game

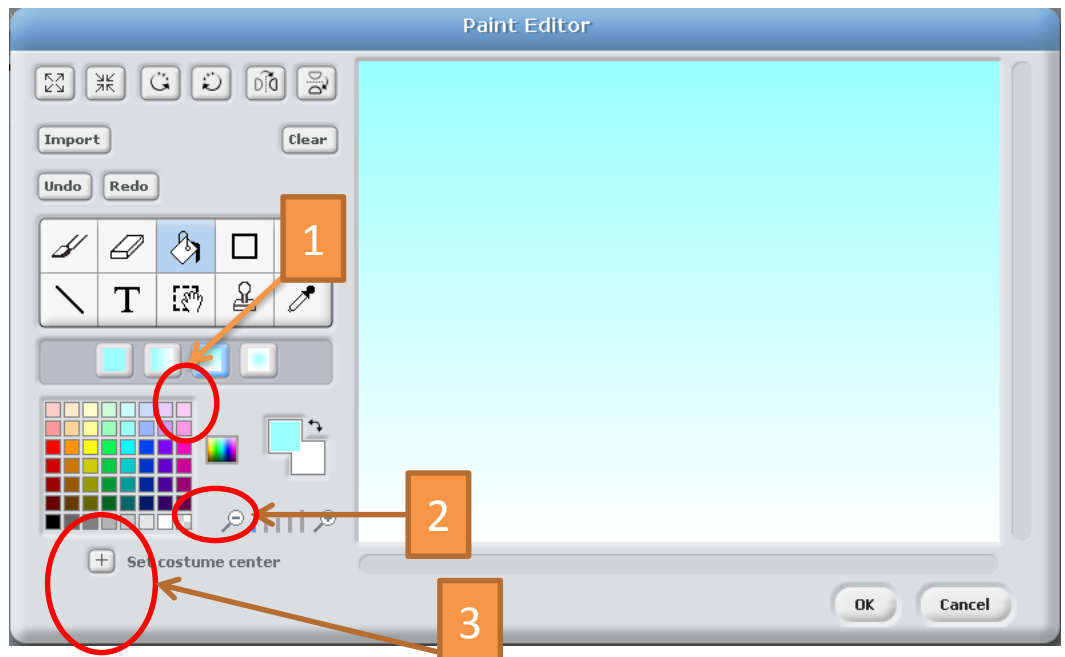

A good background adds a lot to your game. You want to make it visually appealing

Create your background. Remember, try and make it interesting

My Background
