

## Step-Up Reviews (England and Wales)

We have developed a brand new range of 4-6 week review offers to help settings from Early Years through to Post 16 to kick start enhanced practice and rapid improvement on specific areas of need, with the support of our evidence based materials and specialist Achievement Coaches.

These reviews are completely bespoke to your school and setting.

The reviews are one off pieces of work that can be used to support school development planning and evidence for Ofsted. Additional support can be provided thereafter if this is required. The review will provide support, training, and evidence of current practice for all staff, from Governors through to the Leadership team through to your newest member of staff. Our coaches are all previous leaders and experts in these fields, they will provide you with that critical friend and external support and provide you with access to our Bubble for additional resources to use as a staff team.

Each review culminates in a brief review and action plan and is an excellent way to accelerate and demonstrate your ongoing improvement journey.

Each review costs £2500 plus VAT.
